Application for Special Permit – Flexible Frontage for Reduced Density (SP-FF)

Application No. _____

Date _____

Section 8.6 of the Westport Zoning By-Laws

(approved at ATM 5/3/12)

The purpose of this Section is to reduce residential development density, reduce vehicular trips, road congestion, demand for public services and the number of curb cuts onto Town roadways; maintain the natural and cultural resources visible along these roadways; facilitate the movement of wildlife; protect traditional access to “backland” open space; and improve the design and site planning of smaller residential neighborhoods.

To achieve this, the Planning Board *may* issue a special permit to allow a reduction in the otherwise applicable frontage requirements on a public way or a private way that the Planning Board votes to determine has been in existence since prior to the effective date of the Subdivision Control Law in the Town of Westport and has adequate, width, grade and construction within the meaning of G.L. c. 41, §81L for the proposed development, for one or more of the lots proposed, in exchange for a corresponding reduction in development density and reliance upon common driveways, if applicable.

This application form shall be filed by the petitioner with the Town Clerk. A copy of said application form including date and time of filing certified by the Town Clerk shall be filed forthwith by the petitioner with the Planning Board along with all other plans, materials and required fees. ***The Planning Board is not responsible for delays due to incomplete, deficient, or incomplete submissions.***

The following sections of the application describe supplementary information that must be submitted, and those aspects of the proposed site development that will be evaluated by the Planning Board.
