For statement of indebtedness of the Town and other financial statistics, see report of Board of Auditors.

FRANK R. SLOCUM,
JOHN A SMITH,
GEORGE W. RUSSELL,
Board of Selectmen.

Dec. 31, 1926.

Report of Board of Government

BEECH GROVE CEMETERY

The undersigned respectfully submit the following report, as required by Article 1 of the By-Laws. Edward L. Macomber was authorized to sell lots in said Cemetery and write deeds for the same. There are now for sale four lots at \$75.00 each.

There has been two lots sold during the year. We would suggest the need of clearing up the balance of the Cemetery at once.

FRANK R. SLOCUM,
JOHN A. SMITH,
GEORGE W. RUSSELL,

Board of Government of Beech Grove Cemetery.

Dec. 31, 1926.

FRANK R. SLOCUM,
 IRVING C. HAMMOND,
 GEORGE NORMAN,
 Assessors of Westport.

Report of the Board of Health

The undersigned respectfully submit the following report for the year ending December 31, 1926.

The Board organized with Charles A. Hicks, M. D., Chairman and Edward L. Macomber, Secretary.

Frank C. Bly, John C. Partington and William M. Donald were appointed as Inspectors of Slaughtering.

73 Burial permits were issued.

The following contagious diseases were reported to the Board: Dog Bite 1, Measles 52, Mumps 1, Scarlet Fever 11, Pulmonary Tuberculosis 4, Whooping Cough 14, Diphtheria 3, German Measles 1, Influenzal Pneumonia 1, Lobar Pneumonia 1.

CHARLES A. HICKS, M. D.

EDWARD L. MACOMBER,

CHARLES R. WOOD,

Board of Health.

Report of District Nurse

To the Board of Selectmen,

Town of Westport.

Gentlemen:

Herewith a brief summary of Public Health Nursing Services:

Visits to Homes	3370
Visits to Hospital Clinics	624

Patients conveyed for admission to Hospital	33
Visits to School rooms	1236
Sanitary Inspections	240
Talks to pupils	1980
Children treated at School Dental Clinic	250
Children examined at special State Clinics	88
Office consultations and treatments	301
Sick children conveyed home from school	16

Home Nursing Classes are being held weekly in High School and Girl Scouts are being instructed in First Aid.

Three children were enabled to spend vacation at Summer Camp from sale of Christmas seals, and two boys were invited for one week at Noquochoke by courtesy of Mrs. Phillips Social Worker of Union Hospital and Lions' Club, Fall River.

Much joy and comfort was achieved at Christmas by a Christmas Tree at Westport Point Church the gifts from which were given to nurses for distribution among the needy. Individual gifts were also received from other parts of the town. Would it not be possible to have more united efforts in this direction this year? Old linen is much needed at all times.

We are deeply indebted to the Union Hospital, Fall River, for the use of its clinics and unfailing courtesy of social, nursing and medical staff, also to the Red Cross Committee for their untiring efforts.

Thanking the townspeople generally for their co-operation.

Respectfully submitted,
 AGNES E. M. VICKERY,
 C. JOSEPHINE MANHA HOWLAND,
 Public Health Nurses.

Overseers of the Poor

Number of persons receiving aid out of almshouse not living in Town, Jan. 1, 1926	18
Number of persons receiving aid out of almshouse living in Town, Jan. 1, 1926	20
Number of persons receiving full support out of almshouse, Jan. 1, 1926	10
Number in almshouse, Jan. 1, 1926	8
Admitted during year	2
Discharged during year	2
Remaining, Dec. 31, 1926	8

INVENTORY OF TOWN PROPERTY

Dec. 31, 1926

Town Farm	\$3,000.00	Cow	10.00
Wood Lot	600.00	Hay & Grain	261.00
Pine Island	100.00	Provisions	70.00
Furniture	500.00	Wood	35.00

Through careful investigation and follow-up work it has been found possible to collect from other cities, towns and the State considerable money. These reimbursements are not paid to our Dept., but go to the Treasurer and are placed in the Revenue Fund.

These sums are not available for our use but the money is placed in the Town Treasury. To date there is due \$1,792.92, \$700.92 of which has been received. The balance is assured.

JOHN I. GIFFORD,
SAMUEL A. BOAN,
MRS. ROBY C. BURT,
Overseers of the Poor.

Report of the Trustees of the Free Public Library

The Trustees of the Free Public Library respectfully submit the following report for the year ending December 31, 1926:

The Trustees met and organized as follows: Chairman, Nason R. Macomber; Secretary, Ada S. Macomber; Librarian, Annie R. Howland; Assistant Librarian, Louise A. Feenan; Book Committee, Mrs. Howland, Mrs. Feenan and Mrs. Macomber.

Branch libraries have been maintained in the schools wherever the teachers have expressed a wish to have the library cooperate with them. Under the supervision of the school authorities the granting of reading certificates, issued by the State Department of Libraries, has been undertaken.

Lists of books desired are always acceptable to the Trustees as it is their wish to serve the people of the town.

The following magazines are available at the Library: Boys' Life, Good Housekeeping, National Geographic and Popular Mechanics.

The circulation of books for the year has been approximately 3,118, besides books in schools not reported.

The following books have been added to the library during the year:

AUDITOR'S REPORT

To the Citizens of Westport:

We have examined the books and vouchers of the Treasurer and Collector and found them approximately correct.

We have made the necessary corrections and adjustments and present the receipts and expenditures for the year 1926, classified in accordance with a vote of the Town whereby the classification recommended by the State Bureau of Statistics was adopted.

JOHN ALLEN,
WILLIAM H. POTTER,
ADA S. MACOMBER.

ANNUAL
SCHOOL REPORT

TOWN OF WESTPORT
MASSACHUSETTS

1926

ANGELO PATRI SAYS:

I would build a school—a school athrob with an idea—the flowering of a people's hope for their children, an expression of their deep desire to afford youth a taste of all that is good, all that is lovely, all that inspires to health of mind and body.

The very foundation stones will be laid in the tradition of high purpose—the freedom of the human soul to aspire, and plan and endure and achieve. Mass and line and color will etch that message across the sky.

The playgrounds will be sweet open spaces with cool shades and shifting sunny patches. There will be grassy places with splashing water hard by and wee creatures friendly to childhood will live there—bunnies and robins and grave tortoises.

The classrooms will be low-windowed and flooded with sunshine. Sprawly tables and inviting chairs will huddle in intimate groups. Books and pictures will make beckoning signs, the music of the masters will drift through—globes squatting low will tell tales to inquiring fingers.

Big laboratories will disclose secrets to children reverent and understanding of mysteries. Shops filled with tools, snug to the hand, will season knowledge. Some niche there shall be for each child for this is his school, built for his growing.

The American school is more than a building. It is the symbol of a people's ideal. It breathes the spirit of all that we have been and all that we hope to become, at our best. The flag that flies on its towers pledges "our lives, our money, and our sacred honor," to the cause of childhood. In that spirit and in that cause I would build a school.

GENERAL REPAIR MAN

Arthur Lawton

"The strong man lifts the few and puts them down

A TRIBUTE TO THE UNKNOWN TEACHER

And what of teaching? Ah, there you have the worst paid, and the best rewarded, of all the vocations. Dare not enter it unless you love it. For the vast majority of men and women it has no promise of wealth or fame, but they, to whom it is dear for its own sake, are among the nobility of mankind.

I sing the praise of the unknown teacher. Great generals win campaigns, but it is the unknown soldier who wins the war.

Famous educators plan new systems of pedagogy, but it is the unknown teacher who delivers and guides the young. He lives in obscurity and contends with hardships. For him no trumpets blare, no chariots wait, no golden decorations are decreed. He keeps the watch along the borders of darkness and makes the attack on the trenches of ignorance and folly. Patient in his daily duty, he strives to conquer the evil powers which are the enemies of youth. He awakens sleeping spirits. He quickens the indolence, encourages the eager, and steadies the unstable. He communicates his own joy in learning and shares with boys and girls the best treasure of his mind. He lights many candles which, in later years, will shine back to cheer him. This is his reward.

Knowledge may be gained from books; but the love of knowledge is transmitted only by personal contact. No one has deserved better of the republic than the unknown teacher. No one is more worthy to be enrolled in a democratic aristocracy, "king of himself and servant of mankind."

HENRY VAN DYKE

But the great soul through it's effort lifts the town."

There is no greater vocation than teaching.

REPORT OF SCHOOL COMMITTEE

PROPOSED ARTICLES FOR THE TOWN WARRANT

To see if the Town will appropriate a sum of money to cover the cost of installing an electric pump in the High School at Central Village, and take any other necessary action.

To see if the Town will appropriate a sum of money to maintain the State-Aided Independent Household Arts Department of the Westport High School, in accordance with Chapter 74, Section 3 of the State Laws relating to Education, and take any other necessary action.

To see if the Town will appropriate a sum of money to maintain the State-Aided Independent Agricultural Department at the Westport High School, in accordance with Chapter 74, Section 3 of the Massachusetts State Laws relating to Education, and take any other necessary action.

To see if the Town will vote to build an addition to the Greenwood School and take any other necessary action.

To see if the Town will vote to authorize the Selectmen and the School Committee to petition the Massachusetts State Legislature for permission to exceed the debt limit of the Town, in order to provide funds necessary for the building of an addition to the Greenwood School, and take any other necessary action.

To see if the Town will appropriate a sum of money to cover the cost of maintaining Adult-Alien Education and take any other necessary action.

Invest in Education—It Pays

Let Us Make the Good Better

TOWN OF WESTPORT

In School Committee, February 12, 1927

VOTED. That the Report of the Superintendent for the year 1926, be and hereby is, adopted as the report of the School Committee.

AMASA E. REMINGTON, Chairman,
CHARLES R. TALLMAN,
FRANK A. POTTER,

Westport School Committee.

FOREWORD

We begin with the assumption that every citizen of Westport believes that our schools are the most important of all of our public institutions, that their efficiency should not suffer or be impaired for want of adequate buildings and proper financial support; and that our schools, being the very vitals of our town, should have first consideration.

We believe that it is generally recognized by the citizens that our schools should not become overcrowded; that our pupils should not be allowed to attend school on part-time; that our buildings and equipment must be adequate; that more money is necessary to maintain our schools properly; and that something must be done to provide for them necessary and adequate support.

We find that there has been a steady growth in high school enrollment and that crowded conditions have resulted in make-shift arrangements that hamper efficient instruction not only in the high school, but in the grades as well.

We believe that some things can wait; but the education of our children cannot be delayed. Their opportunity, once passed, is gone forever. We owe it to them and to ourselves to afford the best that can possibly be provided. Their interests should come first. Money spent for their education is an investment that will yield incalculable returns.

We realize that some will oppose increased appropriations, but this opposition should not deter us nor you from doing our full duty toward educating the children of our town, rich and poor alike.

Many of our blessings are made possible in whole or in part through taxation, but in Westport it is through taxation alone that the needs of our schools can be met.

We cherish the advantages of free public schools; and no patriotic citizen, be he man or woman, who desires our town to grow and who wishes to give our children a fair chance for an education will shirk his responsibility or seek to escape the payment of a just tax for our schools.

Report of the Superintendent of Schools

To the School Committee of the Town of Westport:
Gentlemen:

It gives me pleasure and a certain sense of gratification to submit to you and through you to the citizens of Westport my third report, the thirty-fourth in the series of annual reports submitted by the superintendents of this town.

Although there are yet many opportunities for growth, Westport has good schools. They are well taught in consideration of the salaries that we pay and the average length of the period of service which our teachers render. They are gradually becoming well equipped for carrying on the activities of a modern educational program.

As a committee of the people, you are responsible for ever changing conditions of which your fellow citizens may well feel proud.

You have rendered an efficient service, one from which very certain outcomes will become evident in the growth of your community along intellectual, civic, and moral lines. You have been co-workers with God in the building of a better world.

With your permission, I shall address my further remarks concerning the school situation directly to the people who pay the bills and to the mothers and the fathers of our children.

Citizens of Westport, you are good people; and you live in no mean town. You love your children, God knows you do, and you desire to do all within your power to provide such educational opportunities and encouragement as will help every last one of them to make the most of himself. You realize that education is a long-time investment; you are aware that the purpose of education is to protect democracy through the right

**The purpose of education is to protect Democracy
through the right training of the youth.**

training of the youth and that even temporary interference with this purpose, through inadequate financial support, may seriously impair the quality of our future citizenship.

For your enlightenment, I shall here record what have seemed to me to be the most important forward steps that have been taken by the Westport School Department during the year that has just drawn to a close, together with certain recommendations that I have made to the School Committee relative to the educational program for the year to come.

OBJECTIVES

Once more our classrooms have been dedicated to the Public Service to the end that everyone who may have entered them might live a more abundant life.

For another year GOOD CITIZENSHIP has been the watchword as our teachers have encouraged and guided our children in their activities.

Such procedure on the part of our teachers has resulted in growth in the pupils. They have acquired more useful information, more skills, more habits, more attitudes, and more ideals in the several fields of social efficiency. These abilities may be classified for purposes of convenience as outcomes in

1. *Character* including love of God, service, courage, loyalty, kindness, self-reliance, honesty and thrift.

2. *Health.*

- a. *Physical health* habits such as cleanliness, posture, food, sleep, exercise, proper use of eyes, appropriate clothing, and the annual physical examination.

**Even temporary interference with this purpose through
inadequate support may seriously impair the quality of
our future citizenship.**

It is better to travel hopefully than it is to arrive.

b. *Mental health* habits including cheerfulness, facing difficulties with courage and a right spirit, and clean thinking.

3. *Command of the Fundamental Processes*, i. e. reading, penmanship, fundamentals of arithmetic, elements of oral expression, elements of written expression.

4. *Worthy Home Membership* which includes a sense of individual responsibility and co-operation in the home, a sense of the home's responsibility for the public welfare, elements of home economics and elementary training in manual activity so that pupils may handle the simple tools.

5. *Citizenship*, i. e., patriotism, obedience to law and constituted authority; sense of debt to others who have achieved in our own and other countries in the past and who are achieving in the present; service, keen sense of personal responsibility to community and country; co-operation and toleration.

6. *Vocation*, i. e., vocational guidance, elementary training for specific vocation, development of an appreciation of the dignity of honest work, maintenance of the right relationships with his fellow workers and society.

7. *Worthy Use of Leisure* through play and physical exercise, appreciation of the fine arts as literature, drama, music, drawing and painting, and enjoyment from reading in a variety of fields.

We find all of these objectives being realized in Westport, sometimes in a greater degree, and occasionally in a lesser degree. Be that as it may, we are always striving, striving. Possibly there is some grain of truth in that statement of Stevenson who wrote, "It is better to travel hopefully than it is to arrive."

PROFESSIONAL GROWTH

Realizing that teachers can not rely alone upon the knowledge which they have gained in high school or normal school or

The teacher who has ceased to grow has crossed the dead line, and begins to die at the top.

college, and fully believing that the teacher who has ceased to be an active student has lost the secret of his greatest power, your Committee has continued to provide from the budget sufficient funds to defray the expense of a continuation of the activities of curriculum building. This work has been lined up as a regular Massachusetts University Extension Course as was the case last year, and has been under the immediate direction of Miss Cora A. Newton of the State Normal College at Bridgewater. The work this year is in the field of mathematics.

In addition to the work in Curriculum Building, we have planned several lectures for the benefit of our teachers. Apropos to activity of this type, we are now planning several lectures on health matters, including such topics as Health Habit Promotion, Teaching Health Through Correlation, and Methods and Devices in Health Teaching. These lectures are to be given by Dr. Fredrika Moore of the State Department of Public Health. Thomas C. Wolff, M. D., our School Physician, is to give us several talks for the purpose of supplementing his report to me to the end that he may help every member of the school department personnel to interpret the findings of the recent medical examination and that he may further advise us concerning follow-up and prevention activities. The doctor also plans to give us several talks on communicable diseases.

Not a few of our teachers attended classes at normal schools, at colleges, and at university extension centers in the near-by cities of Fall River and New Bedford. It is interesting to note that without exception all of our teachers who are now on tenure were members of this group. The teachers at the High School are meeting from time to time to discuss the Problems of a High School Teaching Staff.

Some things can wait.

I take this occasion to commend our teachers on the professional growth that they are making. It means much to our children, to the community at large, and as a by-product of the better service that the teachers are rendering, it must of necessity mean much to them.

I recommend that all possible encouragement be once more accorded to our teachers that they may improve themselves in the profession of their choice and that they may be assisted in their endeavors to participate in the building of a Conduct Curriculum for our children—one that shall be in accord with modern educational advancement.

HEALTH

Our health program is being pushed steadily forward. We are now active in four distinct fields:

1. The prevention of epidemics.
2. The discovery and care of physical defects.
3. Provision for healthful surroundings.
4. The formation of correct habits of thought and action in regard to matters of health.

Our teachers are enthusiastically active in this particular field. We are very fortunate in the quality of the service that is being rendered by Thomas C. Wolff, M. D., our School Physician, and by Miss Agnes Vickery, our School Nurse, and her assistant, Mrs. Josephine Manha Howland. Words cannot express my gratitude to them, nor will they ever receive their final reward for their services on this mundane sphere; but mark what I record here. Our children and their children and their children's children will thank them in sounds that will echo and re-echo over the hills, even as they will praise their teachers for helping them to form right habits of thinking and acting in health matters.

But the education of our children cannot be delayed.

**Their opportunity once passed
Is gone forever.**

I hope that you will read very carefully the reports that have been made to you by Dr. Wolff and by Miss Agnes Vickery, and then I hope that you will give to them the co-operation and the backing that they need in their work for the sake of the young citizens of our town.

AGE OF ADMISSION TO FIRST GRADE

Sometime ago the School Committee made a more or less arbitrary ruling with reference to the age below which no pupil might be allowed to enter school for the first time. In their action they conformed to what appeared to be the general practice and they drew the line at six years of age by the first of January following the opening of school in September. Such a ruling has, without doubt, worked hardships in some instances. Realizing this to be true, provision was made to have under-age candidates for admission to first grade last September examined by Dr. Edward A. Lincoln of the Psycho-Educational Clinic of Harvard University. Of the ten children who were tested, five were admitted on his recommendation. It is interesting to note that each of the five stood in the upper half of his class group at the end of the fall term.

I recommend that all parents of under-age children who expect to present them as candidates for admission to the first grade in September 1927 communicate with the Superintendent of Schools at as early a date as it is possible to do so to the end that proper arrangements may be made for the examination.

**We owe it to the children and to ourselves
to afford the best that can possibly be provided.**

The interests of the children come first.

TRANSPORTATION

The cost of car-line transportation has been doubled by the action of the Union Street Railway Company. Whereas a trip along the northern end of our town to school and return cost five cents at pupil rates before January 1, 1927, it now costs ten cents per pupil. This situation must be taken into consideration in the budget for 1927.

Chapter 40, Section 4 of The General Laws of our Commonwealth was amended by the General Court of 1926 so as to read as follows: "Section 4. A town may make contracts for the exercise of its corporate powers and for the following purposes: For the furnishing of transportation of school children. Contracts for such transportation may be made by the School Committee for periods not exceeding three years."

Acting on the above mentioned permissive legislation as a basis, and fully believing that it was for the best interests of the pupils, your Committee has contracted with the present providers of transportation, with the promise of improved service on their part, for a period of three years from December 1, 1926. Each contract has the approval of our Town Counsel.

Such procedure has already borne fruit. For the first time in the history of our schools, a glazed-in truck body is in operation on one of our transportation routes. Congratulations are due Mr. Charles R. Wood. It is my hope that we may see more of these glazed-in bodies which have been made possible by the three-year basis of contract to the end that our pupils may be more safe and more comfortable on the long hauls.

FINANCES

By the practice of wise economy your Committee was able to live within the appropriations that were voted to them through

**Money spent for their education is an investment
that will yield incalculable returns.**

**For who would keep an ancient form,
Thro' which the spirit breathes no more?**

regular channels on the recommendation of the Finance Committee of the town. You will observe by careful perusal of the Financial Statement that in no instance does any one of the several budget items show an overdraft, and that in many instances an unexpended balance is apparent. You will observe that the actual cost to the town in dollars and cents raised by taxation was reduced by the sum of over \$7,000.00 which was reimbursed to the town treasury on account of the nature of the educational activities that have been encouraged by your Committee.

Our latest annual school returns disclose the fact that the cost of general education per pupil in average attendance from July 1, 1925 to June 30, 1926, inclusive, was \$78.07 per pupil as compared with an average of \$88.78 per pupil for all the towns in our group within the confines of our Commonwealth. I do not argue that we should be proud of this fact; nor should it be an occasion for an over abundance of rejoicing. However, it does indicate that we cannot rightfully be accused of indulging in extravagances.

I recommend that you need the following statement that has been prepared for distribution by the Better Schools League:

THE EDUCATIONAL APPENDIX—SHALL WE
OPERATE?

"Education has an appendix—a useful one. It functions as promoter of the cultural and practical—art, music, dramatics, domestic science, vocational training, physical development. There are those who do not think this organ useful. Frequent is the lament for the "good old days" of better spellers and better figurers, in spite of proof to the contrary.

Are the schools of Westport a public charity to be supported with as little outlay as possible?

"Without the appendix we work for memorization and drill, the 'Three R's'; with the appendix, in addition to these, we work for modification of conduct—to develop higher moral character, better health, greater civic consciousness, closer home relationship, greater vocational efficiency, and more wholesome use of leisure.

"How has this organ of education functioned—what is its value based on two separate tests?

"Take the *service* test: Keeping in mind our twentieth century environment, with its increased leisure, shall we remove the recreational and group interest activities—the gymnasium, the playground, the chorus, the orchestra and the band? Keeping in mind the spending orgy, shall we eliminate the teaching of thrift? Keeping in mind the artificial living, shall we eliminate good health instruction and medical supervision? Keeping in mind the tremendous waste and loss of life by accident or fire, shall we eliminate 'Safety First' inculcation? Keeping in mind the need for self-expression, shall we eliminate art, music, and dramatics? Keeping in mind competitive business and Industry, shall we eliminate 'Safety First' insulation? Keeping in mind the prevalence of citizenship indifference, shall we eliminate the teaching of civic responsibility?

"Take the *interest* test: There are 14% of the total school enrollment in high school today as against 1.1% forty years ago. There are 82.8% of the children, between the ages of 5 and 17, in school today as against 65% forty years ago. Over a similar period of length of the school term has increased 30%. The average number of days attended by each child, ages 5 to 17, has increased over 100%.

"Our schools have moved forward and kept pace with general progress. Shall we remove the appendix which thus has pro-

Or is the education of our children a safe and profitable enterprise in which we shall invest our public funds?

duced the tremendous holding power of the schools? The clock of educational progress is set back a generation when short-sighted civic bodies set out to rob education of its finer side. This process undermines and emaciates it. It brings education back to its bare skeleton, to its kindergarten days.

"Operation on the appendix of education—the removal of those factors in cultural and practical development—on the pretext of retrenchment in public support means physical, social and mental retardation in the community that performs the operation."

"Whatsoever a man soweth,
That also shall he reap."

"Education is the connecting link between our yesterdays and our todays. Yesterday we rode in wagons, plowed with oxen, harvested with the cradle, threshed with the flail, and read by candle light; today we ride in automobiles and airplanes, upheave the fields with tractors, harvest and thresh with one operation, read by electric light and acquire knowledge by radio. Education has developed our yesterdays into todays.

"If there are schools and communities which are still in their yesterdays educationally because of lack of facilities, such as trained teachers, modern buildings, adequate equipment, proper safeguards and concern for health, morals, thrift, safety, and citizenship, then these conditions exist because of lack of local initiative and sentiment. Such handicap is unfair to the child, unnatural to the ambitions of parenthood and un-American in its very existence.

"In gratitude of your prosperity, let your inquiring mind determine the educational opportunity of your community and pledge your influence and support to officials that your schools may be placed in the very today of todays and ready to meet the demand of the tomorrows."

Co-operation is Indispensible.

REPORTS OF THE DEPARTMENTS

I wish to call to your attention the reports of the department heads. I hope that you will give these reports your careful attention to the end that you may the better know your schools.

ACKNOWLEDGMENTS

Permit me at this time to thank my co-workers and all who have contributed in any way, be that contribution great or small, to help the youth of Westport to live more abundant lives.

PLEDGE OF ALLEGIANCE

Citizens of Westport, join me if you will in the following pledge of allegiance: I acknowledge the obligation that I owe to the Commonwealth of Massachusetts and to the Town of Westport for the education which I have received; and, as an expression of that gratitude, I do cheerfully and unreservedly pledge myself and my sacred honor to give such support to the schools of Westport as my financial ability will permit, and always to exert my influence as a citizen of Westport to uphold her ideals and to increase her usefulness in training the youth of today to be the men and the women of tomorrow.

Respectfully submitted,

FRED H. BALDWIN,
Superintendent.

Report of Principal of Westport High School

Mr. Fred H. Baldwin, Superintendent
Westport Public Schools
Sir:

In accordance with custom and your request, I submit my fourth annual report as Principal of the Westport High School.

To the best of our ability, the faculty of the High School have labored during the past year to develop those objectives already established by you, and heartily endorsed by us. In addition, some progress has been made in expanding and strengthening the courses already established, and in taking care of that group of students who feel the urge to continue their formal education beyond the possibilities offered by Westport.

That portion of the school year 1925-1926 not covered in my last report saw but one change in our faculty prior to the close of school in June. Miss Ethelwyn Meagher succeeded Miss Lillian Paine as commercial teacher. Her work during the balance of the year 1926 has been such as to warrant my complimenting you and congratulating the pupils of the High School on your choice of a teacher. Suffice it to say that the balance of the faculty carried through the school year that same spirit of loyalty and effort that marked the first four months of their work.

On June 15th our Senior Class, again consisting of thirteen members, was graduated. While I cannot, in honesty, say that their record excelled the one established by the seniors

Know and help your schools.

of 1925, I do remember them as a splendid class, and one that I believe will prove a credit to Westport. The Class of 1926 have to their credit a goodly sum which I have every reason to believe will sometime be expended for the interest and service of their Alma Mater.

The opening of school in September brought back all but one of the old faculty, and also an additional grade—a seventh grade with twenty pupils. Miss Josephine Pieper, a graduate of the three-year Vocational-Household Arts Course at Framingham Normal School, succeeded Miss Templeton, who obtained a position nearer home and carrying a higher salary. In the four months that Miss Pieper has been with us, I have found her capable, efficient, immaculate, and a winner with her girls. I welcome the visits of anyone to her department and believe that, considering the difficulties surrounding her work, they will agree that it is being well done. A detailed report of the Household Arts Department is being submitted to you by Miss Pieper.

With the introduction of the seventh grade, it became imperative that we have an additional teacher. It seemed more advisable to secure a teacher who could work in all classes of the high school than it would have been to have had a teacher especially for the seventh grade. Miss Ilah Spinney, a graduate of Boston University, where she trained for work in commercial teaching, has shared the work of the Commercial Department with Miss Meagher. She has also handled the Mathematics, including Business Arithmetic, of the seventh and eighth grades. The manner in which she and Miss Meagher have co-operated is commendable, and I am sure we find Miss Spinney a worthy member of our faculty.

Soon after the opening of school, Mrs. Marion King, who had given a large amount of extra time to the development of the English courses, resigned. I wish to take this opportunity to publicly thank her for her untiring efforts in behalf of our school.

Common schools are the hope of our country.

There came to us in our hour of need, Mr. Norman Gifford, who agreed to fill in for a time, and possibly to stay if everything developed favorably. He is still with us, and is proving himself to be decidedly interested in teaching, and has been able to win the respect and friendship of a large body of students. I hope we can convince him that teaching is his field, and persuade him to remain in Westport for another year.

This school year Mr. White is once again doing a good piece of work in his course in Commerce and Industry. He is also experimenting with a seventh-grade course wherein we are attempting to combine geography and history, civics, and other social studies through a development of the growth of man, his institutions, and the study of the commercial and industrial movements, ultimately leading to the rise of strong nations. Through this course we hope to develop a background for the history of our own country and to provide an introduction to our commercial and industrial, as well as our political activities. Ninth-grade Community Civics is also a part of Mr. White's work.

Miss Ruoff is continuing to handle the other history courses in an able manner, and is in charge of the first-year Latin class. At Christmas time, the progress of this class was equal in content to that of a well established and well recognized college preparatory school for girls. This is as we would like to have it.

We have discontinued the two-and-three-periods-a-week classes in beginners' French, and Dr. Breault is now engaged in developing a three-year course in French that will meet at least two years of college requirements this coming June. The task is by no means an easy one, and if the Doctor accomplishes it this year, he is to be congratulated.

In addition to his work in Agriculture, Mr. Oliver is teaching a class in General Science, and another in Chemistry. His special report will cover the work of the Agricultural Department in detail. Now that we have electric lights in several of our classrooms, I hope to see something done in the way of organizing an evening group for boys out of school on farm-labor certificates. This is a part of the agricultural teacher's regular field, and would not appreciably increase the operating expense of the high school.

It would appear that the time is now opportune to establish our Agricultural Courses on a definite schedule, thus making for better grading, classes with a common specific major aim, and a department that can be conveniently handled in the school's program of study. It seems evident now that there will be three distinct groups of boys in the department another year. The oldest group have two years of Agriculture to their credit, and their major unit next year would be dairying, as their interest is chiefly along that line.

Of the other two groups one would be made up of beginners and the other of second year students in Agriculture. These two groups, if we follow the recommendations of our supervisor, Mr. Heald, and the practice in other schools of the State, would be combined on a common project. In this way Freshmen and Sophomores would work in combined classes and their projects would alternate. I am convinced that this plan should be adopted, if we find it possible to adjust a schedule for the same. The following of such a plan means that it will be unnecessary to engage more than one agricultural teacher if agriculture is ultimately offered in each of the last four years of our high school course.

We have scarcely broken the surface of possibilities in this department. Its further development is dependent in part on the effort and support that we in charge give to it and in a large measure to the support given it by the parents of those

pupils who expect to return to agricultural pursuits after leaving school. It seems inconsistent for boys who have stated that they expect to become farmers to elect their majors in academic or commercial subjects, and I doubt if their parents would approve such elections if they were fully conversant with the aims of our high school courses.

I am trying this year to introduce a geometry course that will meet college requirements and will at the same time provide a medium through which to both check up on habits of thought and introduce some aids to clear thinking. The only difficulty at present seems to be that of handling a sufficient amount of content without impairing the second, and to my mind, greater aim of the course. I believe we are making some progress but the course is yet too young to warrant a verdict.

I am inclosing a separate copy of our club activities for the school year 1926-1927. Through our French and Commercial Clubs we hope to make up, in large part, for the removal of these subjects from the curriculum of the eighth grade. All club membership is voluntary and the activities have educational, physical, and social values for the members and some prognostic values for the teachers in charge.

I have in general indicated some of the ways in which we have attempted to strengthen our courses. The special reports, including that of the Commercial Department which will be submitted jointly by Miss Meagher and Miss Spinney, will no doubt amplify my remarks along these lines.

In view of my experiences here and giving due consideration to our tax burden and the needs of the elementary branch of our school system I recommend:

1. That no further extension of the high school curriculum be made at this time.
2. That continued effort be made to strengthen the courses now established.

This recommendation is made on the premise that second year Latin is to be offered to those of the present class who prove competent to go on.

3. That so long as the numbers in the eighth grade permit, we continue to relieve the pressure at the Factory School by including a 7A division in the high school building.

It is apparent, however, that the addition of the third recitation room in the basement should be the last, and our future enrolment should be curtailed to meet our present housing and *handling* capacity.

I submit to you and to the School Committee the following proposition:

1. That those girls and boys who cannot do work of "B" average be not permitted to major in academic subjects.

Academic subjects are chosen for normal and college preparatory work or because a student "likes" them and the public somehow feels that they have a high cultural value. To meet the higher-school requirements a "B" grade is necessary and I doubt the cultural values obtained by one whose combined ability and effort (interest) does not produce (B) "creditable" results. On the other hand, where we can have but *one division* in a subject the poorly prepared or disinterested students hold the entire class back and "steal" the opportunities of those who are prepared and willing to progress.

2. That those girls and boys who fail to do work of "B" average in 9th year Commercial Studies be not permitted to elect a major in that field until such time as they have succeeded in doing preparatory work of "B" grade.

Those phases of Commercial Office Practice that we handle in the last three years of our high school course prepare students for positions in a field already crowded in our own section of New England. Because I believe a good typist, stenographer, bookkeeper, or clerk must have at least creditable

preparation, and because one must be "good" to succeed in a crowded field, I consider it unfair to taxpayer and pupil to permit any and all to give the major part of their four years of study to Commercial Office Practice.

3. That parents of those students failing to do 12 periods of passing work for two consecutive years be advised, the age of their children permitting, to remove them from high school.

Twelve periods of passing credit represent but three-quarters of the minimum annual pupil-subject-load. Considering that constants have to be repeated and that majors would ultimately be restricted to Agriculture or Household Arts, if my previous recommendations were adopted, it becomes apparent that one failing to pass in twelve periods of work for two consecutive years cannot succeed in anything we have to offer, but can, if permitted to remain, become a drag on any class. It also follows naturally that anyone who is not succeeding becomes dissatisfied and disheartened, and the worst thing we can possibly do for such a person is to keep him where such a condition holds true.

This fall, our school physician, assisted by the school nurse, made the most thorough-going physical examinations we have had during my service in Westport. We are now making an earnest effort to follow up cases that need correction. The best of physical examinations go for naught if the results of the same are ignored. For the sake of our youth, I urge parents to co-operate. I am certain the doctor and nurse feel much as I do—that we are here to serve and assist parents in these corrections only so far as they care for us to, but that it is *their* duty to do what they can, and if necessary take advantage of such free services as our departments in town can arrange.

Through games and athletics we are trying to do what we can with the limited means at hand to promote the physical

and moral welfare of our students. In these efforts I am receiving creditable co-operation from all the faculty.

As I study the problems of our curriculum in its relationship to the pupils and their welfare, I am becoming firmly convinced that the answers, if there be any, can only be found through a hearty co-operation on the part of teacher, pupil, and parents. The parents do not know all the teachers, and we teachers certainly do not know all the parents, and until we do, complete co-operation is impossible. I therefore recommend a High School Parent-Teacher's Association, and that the high school building be made available for its meetings. I also strongly urge parents and teachers to enroll if such an organization is established.

The condition of the school plant is, on the whole, very good. Those rooms designed for classes and study groups are entirely satisfactory from the viewpoint of health. The basement rooms are, of course, "temporary" in name, and should be in reality. As practically all the small classes must recite in these smaller basement rooms, it means that many of the upper classmen spend practically their whole day in the basement. I earnestly recommend that some mechanical and semi-automatic means of "air-flushing" the whole basement be installed, and a system of heat control be worked out for these rooms, if such be possible.

The introduction of the dual purpose commercial desks makes our commercial room available for much larger classes in other subjects, and our smaller shorthand classes use the small recitation rooms. This proves an economic use of space, which is what is necessary under prevailing conditions.

In the face of an ever-increasing host of duties, our janitor, Mr. Bowman, is doing an excellent piece of work. I strongly urge that provision be made either in the General Budget or by means of a special article in the Town Warrant, to provide an automatic electric pump at the high school. Such a pump

would to a considerable degree, release Mr. Bowman for other services. I am sure those of our citizens who are acquainted with the hours that he puts in, will agree that such action would not "spoil" him or provide time for him to sleep on the job.

Feeling that perhaps the School Committee Report can provide space for material that would otherwise need publication in a high school manual I have taken the liberty of making an unusually long report. I am also inclosing material relative to the organization and functioning of the high school.

Again permit me to thank you and through you the School Committee and all others who have supported the high school and given me freely of encouragement and help.

Respectfully submitted,

MILTON E. EARLE,

Principal.

Report of Commercial Department

Mr. Fred H. Baldwin, Superintendent
Westport Public Schools
Westport, Massachusetts

My dear Mr. Baldwin:

Inasmuch as the work of the Commercial Department—both beginning and advanced—merges into but a single unit of the High School curriculum, it has seemed advisable to make but one report covering the work of the entire department. We, therefore, submit with pleasure the following report of the work of the Commercial Department of the Westport High School for the school year 1926-27.

We have been striving to make the work of this department both interesting and profitable to every student who elects it. It is not a "snap course." It cannot be. Our students, after working faithfully for four years in this department should be capable of entering the business field as efficient, capable bookkeepers, stenographers, and typists, with a practical working knowledge of office routine, and should compare favorably with graduates of any near-by high school.

It is true that not every pupil of high school age chooses a course that is best suited to his capacity and ability. To avoid the tragedy of a pupil's spending four years on work that is entirely unsuited to him, we now offer a first-year course in commercial work as a try-out from which are eliminated at the end of the year those pupils whose work indicates no aptitude for this particular vocation.

Our Commercial Course, outlined briefly, is as follows:

First Year

BOOKKEEPING I

Two periods a week

Aim: a mastery of the fundamentals of double-entry bookkeeping as a background for Bookkeeping II.

Content: a thorough study of the elemental accounts, original books of entry, trial balance, balance sheet, and statements. Practical exercises and one complete set of books.

TYPEWRITING I

Three periods a week

Aim: a mastery of typewriting technique and ability to write accurately.

Content: development of typewriting ability, beginning with the simplest letter combinations, working up to words, sentences, paragraphs, and simple business letters.

Those pupils who have completed satisfactorily the first year course as outlined above are now ready to study:

Shorthand I

Typewriting II

Bookkeeping II

which subjects comprise the commercial course for second year work.

Second Year

SHORTHAND I

Five periods a week

Aim: the mastery of a good working knowledge of the fundamentals of shorthand.

Content: a study of the fundamental principles of shorthand. The dictation of simple letters.

TYPEWRITING II

Three periods a week

Aim: the development of skill in the arranging and typing of business letters; the development of perfection in copying material; the development of speed in typewriting.

Persistence must become a habit

Content: the study of "set-up" and the arrangement of business letters, forms used etc.; rhythmic drill work for the purpose of developing speed and accuracy.

BOOKKEEPING II

Two periods a week

Aim: a thorough working knowledge of the fundamental principles of partnership bookkeeping.

Content: a quick review of the fundamentals of first-year bookkeeping; a study of the technique of partnership bookkeeping; two practical supplementary sets.

Third Year Work.

SHORTHAND II

Four periods a week

Aim: the ability to take dictation correctly and with speed.

Content: Review of fundamentals; practice dictation, dictation to be actually transcribed in the typewriting class.

TYPEWRITING III

Three periods a week

Aim: the ability to transcribe on the typewriter from shorthand notes, perfect, neat, well set-up, letters which include correct English, Punctuation, and Spelling.

Content: The transcription of actual letters dictated in the Shorthand II class; special attention being centered on perfection of typing, neatness, correct set-up, English, Punctuation, and Spelling.

BOOKKEEPING III

Two periods a week

Aim: to cover the principles of corporation bookkeeping so that the students have a good working knowledge of corporation transactions.

Patience must be made automatic.

Content: a study of the principles of corporation book-keeping with the completion of two practical supplementary sets.

Fourth Year.

OFFICE PRACTICE

Four periods a week

Aim: a "finishing" course to enable students to become familiar with general office routine; and the uses of various office appliances.

Content: the study of: the duties of a secretary, filing, the handling of office mail, telephone technique, the operation of the mimeograph, mimeoscope, and billing machines; practical application of shorthand and typewriting is worked into this course.

In the year 1927-28, it is planned to make this an eight-period-a-week class. Its membership will consist entirely of pupils who have already had Shorthand II, and will devote their laboratory periods to Office Practice. During this present year, pupils have been spending four hours a week on Shorthand II, and four hours a week on Office Practice.

Two extra-curricula clubs, a Shorthand and a Typewriting Club, and a Typewriting Club are added features of this department. Their membership consists of those pupils of the seventh and eighth grades who at the present time intend to pursue the Commercial Course. Each club meets one hour a week for the purpose of studying the fundamentals of Shorthand and Typewriting, in one case; and of Typewriting, in the other. Although we cannot go deeply into this work in our twenty meetings, we feel that through this club work each pupil is becoming familiar enough with

Learning is the natural source of wealth and honor.

You must creep before you can walk but if you seize upon every aid to progress, you will soon be standing upright.

these commercial subjects to determine the advisability of his electing the commercial course in the ninth year. In other words, we hope to avoid the mistake that so frequently is made in choosing a high school course—that of trying to pursue a course of study which is entirely unsuited to the individual.

A survey of the equipment of the Commercial Department might be interesting.

1. As a result of the three-year exchange system that was inaugurated last year, we have this year exchanged one Royal typewriter and three Remington typewriters for new models of the same manufactures. With these older machines replaced by new ones, it is a pleasure to state that all of our typewriters are in excellent working condition.

2. In addition to its new typewriters, the Commercial Department boasts of twelve new secretarial desks of the same type that is found in actual business offices. These dual-purpose desks not only conceal the typewriters when not in use, but also enable us to use the Commercial Room for recitation periods in other subjects, thereby adding to both the efficiency and appearance of our room.

3. A new mimeograph table this year has facilitated our work with the mimeograph. In addition, we are happy to say that the suggestion that a mimeoscope be added to our equipment has been followed. This machine has been especially serviceable in the preparation of music copies not only for our own regular and club work but also for the several schools in our system thus curtailing the expense of purchasing new music copies and books.

4. We have "added" to our equipment the high school victrola. With a set of records prepared especially for typewriting work, our classes devote a part of their time to typewriting to music. This develops an even touch and a sense of rhythm, both of which are essential to accurate and rapid writing.

5. We take this opportunity to suggest the addition of a Monroe Electric Calculating Machine to the equipment of this department. Such a machine would be of immeasurable advantage to our students, for having once mastered its operation, there is little question but that they would be capable of operating any machine of this type which they might meet in the business field.

For the never-failing co-operation from our superintendent, principal, and fellow workers we are grateful, and we take this opportunity to express our sincere thanks and appreciation.

Respectfully submitted

ETHELWYN E. MEAGHER
ILAH SPINNEY

Report of Household Arts Department

Mr. Fred H. Baldwin,

Superintendent of Public Schools,
Westport, Massachusetts.

Dear Sir:

It is with great pleasure that I submit to you and to the people of Westport my first report of the Household Arts Department of the Westport High School.

My work in this department started at a time when the policy of concentrating the Household Arts activities of this school into the tenth and eleventh grades first became operative. As a result, this year's enrollment has been small. Such a policy, however, should soon lead to a much larger pupil membership and also permit of standardizing the work in each subject on broad but definite problems for each class. It is now possible for all girls who are not making definite college preparation to take all the work of Household Arts Department and still have three-fourths of the last four years of public schooling open for work in the other subjects of our curriculum.

Two groups of girls should find their way leading to the selection of the Household Arts Course. Those girls who do not expect to graduate and who, for various reasons, find themselves behind the majority of pupils of their own age; and those girls who realize that regardless of their plans for the future, such information and skills as they can pick up in Dressmaking, Millinery and Home Economics are bound to be of value to them, will naturally arrange their work to include the Household Arts Courses. It would seem only a matter of a short time, therefore, be-

fore practically every girl who graduates from our High School will have completed the Household Arts Course. The truth of the above statement is dependent upon the actual operation of the Course and as the only full time teacher in that department a large measure of this duty is mine. I assure every citizen of Westport that it is my determined resolution to do my very best to make the Household Arts Course a worthwhile one in every respect.

Girls in the ninth year now take General Science. In this course I assist the girls in the study of textile fibres, dyeing, household physics, and personal hygiene. In addition we do elementary sewing which now includes hand-work (patching and mending) and the use of the sewing machine. We each expect to complete a simple garment before the end of June. This preliminary course is offered as an introduction to the intensive work of the next two years.

The work in clothing during the tenth and eleventh years includes the use and alteration for use of standard patterns; the renovation of clothing that might otherwise be discarded. Millinery including both new construction and renovation will be studied in season and we hope that our graduate will be in a position to dress herself well and in good taste at the minimum of expense.

The work in Drawing is twofold; a simple and practical study of costume design dealing with lines, color schemes, simplicity, becomingness, and harmony in dress is the first objective. Both in theory and in practice emphasis is placed upon durability and service as well as appearance in the design and construction of garments. The second objective deals with home-making ideals and ideas. A study of house planning and furnishing with emphasis upon economy in space, cost, and movement without the sacrifice of

Nothing is to be expected thence but by labor.

comfort and attractiveness is our present plan. Familiarity with reading floor plans and simple elevations will be included if time permits.

The course in Laundering aims to teach methods of cleansing, drying, and caring for different fabrics and garments; the composition and intelligent use of laundry aids and the use of equipment.

The aim of the Foods work is to teach the cooking processes and principles, the use of standard equipment, marketing, planning, preparation and serving of meals, and to set standards of housekeeping.

In connection with the Foods and Clothing work, a course in Home Problems is given. This deals with budgets for the individual and the family as a whole, distribution of the income, purchasing of household supplies, and the keeping of household accounts. Another phase of this subject is the actual care of the home itself, including the division of responsibilities, time schedules and labor-saving devices and practices.

A "Craft Club," composed of girls who are not taking Household Arts work at present, but who have had at least two years of work under supervision, has been organized and is in full swing. The girls are now working on individual problems of their own selection.

This year we have had some very successful class lessons, and commendable work has been done in the line of house-keeping. Much responsibility has been shouldered by the girls, to their own as well as to my satisfaction. Hot cocoa is served daily and occasionally a hot dish is served to the school at large, although the purpose of the course in Foods is to teach the preparation of food not on a cafeteria basis, but on a family scale. Each girl has made a tailored cooking uniform which she wears in the school kitchen.

Many useful and attractive Christmas gifts were made during the holiday season.

I have begun to visit the girls in their own homes in order to secure the fullest co-operation possible from the parents, and I am very much pleased at the results already obtained. The Household Arts Department is open for inspection at all times, and I cordially invite the people of Westport to come and visit us.

Respectfully submitted,

JOSEPHINE M. PIEPER.

Report of Agricultural Department

Mr. Fred H. Baldwin,

Superintendent Westport Public Schools.

My dear Mr. Baldwin:

In accordance with the custom of the School Department, I wish to submit this second annual report of the Agricultural Department in the hope that it may be read by all the citizens of Westport, that they may know something of the accomplishments of the department, to the end that they may realize its opportunities and benefits.

The emphasis during the past school year was placed on general gardening in all its phases. Considerable time was placed on soil types and how to handle them. Fertilizers were thoroughly studied as to composition, function, and application. In connection with this work, Manuel Vincent carried on a demonstration this past summer which showed decisively the benefits of an application of a commercial fertilizer on mangel wurtzels commonly known as "cow beets." Kinds and varieties of vegetables were studied, together with the methods of culture of each. Such plant diseases and insects as are common in this locality were discussed and ways and means of combating them were worked out. Garden plans were worked out which the boys made actual use of in the summer. It is worthy to note here that Louis Goulart, enrolled in this department, won the prize offered by Principal Milton E. Earle for the best plan for the improvement of the school grounds.

**The most important agricultural tool is a pencil
for making calculations.**

The subject of farm accounts was not neglected, and each boy completed a typical set of farm books during the year.

This does not mean that the other phases of agriculture were neglected. Such dairy problems as arose at the homes of the boys were studied and solved. Considerable milk testing for butter-fat was done for various farmers about town, some seventy-five different samples being tested. Sufficient poultry material was covered to enable the boys to successfully carry on their home poultry projects. Valuable experience in removing rocks and grading was gained from the work in putting the athletic field in condition to use. Another class exercise of great value was the renovating of an old orchard on the home farm of one of the boys. The usual class-room procedure was further supplemented by the use of twenty-five sets of lantern slides loaned by the United States Department of Agriculture and distributed through the efforts of Mr. Franklin E. Heald, Agricultural Teacher-Training Supervisor. These slides covered a wide range of subjects dealing with farm activities. The list included such subjects as "Orchard Management," "Breeds of Poultry", "Handling Market Milk," "The Kitchen Garden," and "Potato Growing."

The agricultural activities of the boys outside of school hours may be grouped under the headings of project work and other supervised agricultural work. The project work in turn may be divided into poultry and garden projects. In this work, seven boys working with one hundred and fifty birds and about an acre and a half of land, produced \$327.50 of poultry products and \$780.25 of garden produce. This total of \$1107.75 combined with the value of the service rendered in other supervised agricultural lines which figured

**When we're too old to learn, we're too old to live,
And as long as we're green, we're growing.**

\$1818.85 makes a total tangible productivity of \$2929.60. Comparing this figure with the \$1692.65 which it cost to maintain the department the past year, it would appear that the work was justified from a financial standpoint. While the dollars and cents showing is gratifying, it is at its best but a small indication of the benefits derived from this course.

The quality of the boys' work is indicated by the number of prizes they won when they exhibited their products at the Westport and Brockton Fairs. The Junior Department at the Westport Fair was the largest that it ever has been due largely to the interest shown by the boys in this department. In the vegetable displays they won seven firsts and three seconds. Their poultry they exhibited in competition with the adults, and they took three firsts and four seconds. With the help of Mr. Wyeth, County Club Leader, and members of the poultry and cattle departments judging contests were held. The boys won one first, two seconds, and two third prizes. Their total winnings amounted to \$28.25.

At Brockton Fair in State wide competition, the boys won six firsts, one second, and two thirds on vegetables. Every exhibit that they entered took a winning place. Twenty-three dollars was won. The first prize for the Garden Club Display put on by the boys as a group, won out over seven others representing schools of Greater Boston and Worcester.

To the man of insight and forethought the benefits and opportunities of this department are innumerable, and in a town where eighty per cent of the population depend on agriculture for their livelihood, this department should be the largest and most serviceable. The department is here. We make an honest effort to reach those whom we can

best serve, but to you with whom we have not yet come in contact we extend the wish that you would bring your problems to us that we may be of service to each other.

In closing this report I wish to thank you, Mr. Earle, the School Committee, and all others for the hearty and sincere co-operation which has been extended to me in my work.

Sincerely,

CHARLES F. OLIVER, JR.

**The instruction of the people in every kind of knowledge
that can be of use to them ought to be the care
of the Public. — John Adams.**

Report of Instructor of Americanization

Mr. Fred H. Baldwin, Superintendent
Westport Public Schools

My dear Mr. Baldwin:

I hereby submit the second annual report of the Alien Evening School for Citizenship and Americanization.

It is of great importance both to the welfare of our country and to the happiness of those among us who have come from countries of other speech than ours that they be given every possible opportunity to learn English, and that they be induced to make use of their opportunities.

This then is our problem. How are we meeting it? We have organized two classes, meeting at the Factory School, twice a week on Tuesdays and Thursdays from seven to nine o'clock. It is just a year since this work was undertaken. In the beginning we had to go to New Bedford for teachers experienced in this particular work, but now we have two of our own teachers trained to carry it on.

To induce these adult aliens to take advantage of the opportunity to learn English has met with only fair response. Any man or woman in America who does not know English is doomed to live only in the small world of some one racial group, to remain a stranger in the larger world of the whole people and to suffer a constant handicap in business and social intercourse.

To stimulate a more lively interest, recruiting conducted upon scientific principles must be employed.

Workers in the field, clubs, and societies organized to promote interest and industrial and social leaders appealed to are but a few of the agencies to be employed.

Our problem is necessarily difficult. Our community is widely scattered and in times of adverse weather conditions it is a hardship for our pupils to come long distances.

However this difficulty must be overcome. Looking forward to the best results in our work and with the "do or die" spirit, we will carry on to the finish.

Respectfully submitted,

ARTHUR J. McCARTHY,

Instructor.

Report of the Supervisor of Special School

Mr. Fred H. Baldwin, Superintendent
Westport Public Schools

My dear Mr. Baldwin:

In accordance with your request I submit my report as Supervisor of the Westport Special School.

Our school started in a very modest way Dec. 1, 1924 with thirty pupils and two teachers in one room. This beginning was made for two reasons: first, because the State law required its establishment; second, because the superintendent and school committee of our town accepted as a goal for their work, "the training of self-controlled, self-supporting citizens," and realized that to reach that goal success in school work must be made possible to every child in the system.

The regular grading system in use today does not provide for the pupil who develops more slowly in mathematics than in language, or the other way around needs special help or more time spent on language work than mathematics. Nevertheless these pupils, given their proper attention, may in later life be quite as successful as some who pass quickly through the grades with abilities evenly balanced. In special class our work is only limited by each child's accomplishment in any subject, going slowly or quickly just as the need arises. Since much of the work is on the project basis it cannot always be measured by textbook pages but in all our work we have tried to bear in

mind the fact that "the only real teaching is that which makes character."

Gradually adding to our equipment, we had two rooms with an enrollment of sixty-five during the year 1925-1926. Following out the state recommendation given during that year, September 1926 found us housed in the Westport Factory building with four teachers besides myself. During the fall term we have had an enrollment of eighty-one. We are using three rooms besides having in the basement a good kitchen and a shop for manual work of many kinds.

The teachers associated with me are trying in every way to advance this work to the best that can be done and join with me in thanking the people of the town, the School Committee and you for the helpful interest shown in our school.

Respectfully submitted,

KATE W. TALLMAN,

Supervisor.

**"We can do without fire in the house for half of the year,
but we must have music the year 'round."**

Report of the Supervisor of Music

Mr. Fred H. Baldwin, Superintendent
Westport Public Schools.

My dear Mr. Baldwin:

With a keen interest in the educational growth of the Westport Schools, the children's welfare, and the people's prosperity, I enjoy making my first report as Supervisor of Music in the Westport Public Schools.

My visits to each school once in two weeks are anticipated with a great deal of pleasure—due to the eagerness I feel in seeing the development of good music and the ability to appreciate it, established in the schools. We should never lose sight of the fact that music is a large subject, consisting of many branches. It is comprised of vocal music, instrumental music, theoretical music, history of music and biography of musicians, and it is as important to a child's education as his academic work. The time allotted to music in public schools is too short to cover all these branches, but it should be our chief aim in teaching music to arouse the children's interest and to develop the desire to sing in the beginning of the child's school life. The second aim in teaching songs is to provide the children with musical experience which shall serve as a basis for further development.

Keeping these aims in mind we gradually go from rote singing to sight singing, explaining difficulties in the technical work as they appear.

Folk dancing and singing games in the grades form an important part as they are the means of interpreting music and

**"Song brings of itself a cheerfulness
That makes the soul to joy."**

contribute to the child's rhythmic development, in addition to their recreational value.

The gymnastic work is also important in the school life as it tends toward good health and posture.

The Westport Schools have a very fine beginning in which to expand this subject, as all the schools are equipped with a set of "The Progressive Music Series" Book I., except the South Westport and Sanford Road Schools which are still using the rote system of teaching, as they consist of the primary grades only. A complete set of "The Progressive Music Series" Book 2 was added to Greenwood Park School. A teacher's manual has been supplied for every school to aid the teacher in presenting this course to the children. There have been victrolas installed in all the schools, as aid in music appreciation, folk dancing and gymnastic work. The School Department contributed ten dollars' worth of educational records to be used in the different schools.

At the High School a Girls' Glee Club and a "Ukulele Club" have been organized. I found a splendid school spirit and co-operation with the girls in rehearsing and studying for an entertainment to be given in February. I spend a period every other week with the seventh and eighth grades in technical work and feel that it will be well worth while in future Glee Club work. There are splendid possibilities of organizing a Boys' Glee Club and forming an orchestra in the near future.

I wish to express my appreciation to the grade teachers in Westport for their co-operation in teaching this subject; to the Commercial Department for the use of the Mimeograph Machine; to the Commercial teachers for their willingness to help stencil some of the High School music; to Miss Ruoff for

her splendid aid to the Glee Club in being their accompanist; to Mr. Earle for his readiness to establish music in the High School; and to you, Mr. Baldwin, and the School Committee, for your prompt advice in the problems that confront me from time to time.

This new phase of work introduced in our schools is a splendid advancement in the progress of the Westport School Curriculum. The setting up of ideals and ambitions along this line is as worthy as in other lines.

Respectfully submitted,

DORIS BAKER,
Supervisor of Music.

Report of School Nurse

Mr. Fred H. Baldwin, Superintendent
Westport Public Schools

My dear Mr. Baldwin:

I herewith submit a report of the school nursing service during the year 1926:

Visits to schoolrooms	1,236
Sanitary inspections of school premises	240
Pupils examined	3,822
Talks to pupils (individual and group)	1,980
Office consultations and treatments	301

HOME VISITS

Instructive	471
Investigative	684
Nursing school children	219
Social Service calls related to school children	626
Number of sick children conveyed home from school	16

TOTAL	2,016
-------	-------

CHILDREN HAVE BEEN CONVEYED TO THE FOLLOWING CLINICS AT THE UNION HOSPITAL

Nose and Throat	81
Ear	13
Eye	83
Medical	53
Surgical	41

Orthopaedic	36
X-ray	54
Skin	98
Heart	7

Neurological	17
Tonsil and Adenoid Operations	17
Admitted to hospital for other treatments	6
TOTAL	512
Children treated at School Dental Clinic	250
Children examined at special State Clinics	88
Children conveyed to optician	27
Meetings attended	13

The State physical record cards which have been in use for several years, are being continued. We have added defect lists, clinic cards with records of recommendations, family history folders, correspondence, and address files. This complete filing system so necessary to sound clerical work and imperative for complete co-operation between nurses, has been made possible by the school committee. They supplied a filing cabinet for the purpose.

The addition of scales in a majority of schools and the use of portable scales in the one-room school houses, we hope will add to the pupils' interest in being up to standard weight. Although an absolute normal cannot be arrived at in weight owing to variations in types and other factors, there are deviations from average which bring us to the danger line. Ten per cent (10%) underweight is usually regarded with suspicion, or at least accorded strict observation. The standard used is the Baldwin-Wood, Weight-Height-Age tables provided by the State Department of Public Health, and published by the American Child Health Association.

A typed list of defects found at the medical examination, which was of a thorough nature this year, and which gives us formidable figures, has been supplied to each school in order that teachers may assist in securing corrections. Complete co-operation between teachers, pupils, nurses, and homes is necessary to this end.

The foods department and the serving of hot lunches in the Factory School is a great asset in health teaching, as the pupils gain first-hand knowledge of correct foods and methods of preparation. Greater facilities for providing hot drinks and the co-operation of parents are needed in some of our schools.

Three school children were enabled to benefit by a vacation in a summer camp, through the sale of Christmas seals. A Westport boy was given credit for gaining most weight in his month's sojourn.

By the courtesy of Mrs. Phillips, Social Worker, Union Hospital, and the Lions' Club of Fall River, two of our boys were invited to spend a week at the Noquochoke Camp. Increased opportunities for this type of vacation would prove very beneficial.

The supply of health posters bought by the school committee and those loaned by the State Department of Public Health have aided materially in impressing the children of the value of good health. "A GOOD POSTER HAS SOMETHING TO SAY AND SAYS IT HARD." Much more good can be done in this line, and I should like "LET'S MAKE HEALTH FASHIONABLE," to be our slogan this year; for truly, "the health of the child is the strength of the nation." I therefore hope that more money may be devoted to the purchase of attractive health posters, as an incentive to original efforts.

As the corrective work takes so large a portion of the nurses' time, the promotion of health habits must of necessity be undertaken by the teachers. They are deeply interested in the physical

well-being in addition to the mental welfare, as they realize that the latter depends on the former.

The Report of the Joint Committee on Health Problems in Education, edited by Thomas Wood, M. D. of Columbia University and Theresa Dansdill's "Health Teaching in the Schools" provided by the Massachusetts Tuberculosis League, have been placed in each school. Reference material by various health authorities is also now kept in our office for general use.

Charts have been provided in each classroom to help in checking up on the temperature and to encourage children in securing healthful conditions for their advancement.

Clinical thermometers and disinfecting material have been added to the First Aid Supplies, that teachers may verify their suspicion of any child being in an unfit state of health to remain in the school. Only by acute observation of symptoms of disease by teachers, parents, and nurses can epidemics be averted. Daily inspections of throats were made by nurses during the prevalence of Scarlet Fever.

The instalment of telephones in the schools has been of immense value in reporting illness and in otherwise promoting our health program.

Dental hygiene is a subject that is very incompletely covered for lack of available funds. The Services of a Dental Hygienist from Fall River were secured for one week, when prophylactic treatment of teeth was given at the nominal charge of fifty cents each pupil. A great number failed to benefit by this opportunity, not realizing the full value of the work given. Much educational work needs to be done in this direction, which can only be accomplished by securing the services of a dental hygienist. Few parents understand the importance of caring for the first permanent tooth which appears in the sixth year, and the fissures which cannot be detected by inexperienced eyes. This knowledge can be conveyed home by the children when thoroughly instructed.

It has been stated that "In every community in which oral hygiene has been introduced as a part of the school health program, not merely satisfactory but brilliant results have followed. It has always meant cleaner, better, happier, and more intelligent boys and girls."

Our children's field days at Lincoln Park and at the annual fair are instrumental in securing an active interest in physical education.

A nutritionist was sent here by the State Department of Public Health to visit the homes of children previously examined at the State Clinic and found to be **unimproved this year.**

Every convenient opportunity has been taken advantage of to attend conferences and courses on health matters and also to study the methods of the more advanced towns.

We are deeply indebted to the Social Service and Medical Staff of the Out-Patient Department of the Union Hospital, Fall River, for the large amount of free work done. We are also grateful for your own interest and that of the School Committee and for the willing co-operation of our teachers in health work. I wish to take this occasion to publicly thank Mrs. Josephine Manha Howland, R. N., for the efficient assistance that she has rendered in connection with the school nursing service.

I hope that the progress will not cease until the town has an A standard of physical fitness. Let us make the good better!

Respectfully submitted,

AGNES E. M. VICKERY, R. N.,

School Nurse.

REPORT OF ATTENDANCE OFFICER

Mr. Fred H. Baldwin, Superintendent
Westport Public Schools

My dear Mr. Baldwin:

If our teachers are to be expected to do their best work in behalf of the children, they must be helped in many ways by the parents to the end that they may be in a position to do so.

The following school laws should be called to the attention of some of our citizens:

GENERAL LAWS RELATING TO EDUCATION OF THE COMMONWEALTH OF MASSACHUSETTS CHAPTER 76.

Section 1. (As amended by Chapter 463, Acts of 1921). Every child between seven and fourteen, every child under sixteen who does not meet the requirements for the completion of the sixth grade of the public schools of the town where he resides, and every child under sixteen except a child holding an employment certificate as provided in chapter one hundred and forty-nine and employed in some regular employment or business for at least six hours per day, and except a child having the written permission of the superintendent of schools of the town where he resides to engage in profitable employment at home, shall, subject to section fifteen, attend a public day school in said town or some other day school approved by the school committee, during the entire time the public schools are in session, unless the child attends school in another town, during the entire time the same is in session, under sections six to twelve, inclusive, or under chapter seventy-one; but such attendance shall not be required of a child whose physical or mental condition is such as to render attendance inexpedient or impracticable, or who is being otherwise instructed in a manner approved in advance by the superintendent or the school com-

mittee. The superintendent, or teachers in so far as authorized by him or by the school committee, may excuse cases of necessary absence for other causes not exceeding seven day sessions or fourteen half day sessions in any period of six months.

With appreciation of the co-operation which is being shown in so many ways, this report is

Respectfully submitted,

RICHARD J. SHORROCK,

Attendance Officer.

School Physician's Report

Mr. Fred H. Baldwin, Superintendent
Westport Public Schools

My dear Mr. Baldwin:

I submit herewith a report of my activities as School Physician since my appointment on September 1, 1926.

METHOD OF EXAMINING PUPILS

The method of examining pupils as explained to and approved by the School Committee was as follows:

A. High School young men: A complete strip as in army and navy. As these pupils indulge in strenuous athletics, a rigid examination is essential.

B. All others: Stripped to waist and removal of shoes and stockings. These pupils require a less rigid examination which includes, however, the use of the stethoscope applied directly to the skin. In my opinion, whenever clothing intervenes between skin and stethoscope the confusion of sounds produced renders the findings of the examiner highly speculative.

Whenever for any reason a parent objected to a pupil being examined by me the physical record card was given to him with the instruction to have it filled in by the family physician. As this occurred in only eight instances it is evident that the type of examination was appreciated by the majority of the parents.

The attendance of parents at the examination of their children was cordially welcomed and in several instances it manifested a co-operative tendency on their part. Principal Milton E. Earle and occasionally another male teacher was present at the examination of all High School young men. Miss Agnes Vickery

and occasionally one or more of the women teachers were present at all other examinations.

It is not pretended that such a brief examination will disclose any but the most outstanding defects. It will of course give certain evidences of hidden conditions but not sufficient evidences for the establishment of outright diagnosis. These evidences and the suspicions which they arouse are mentioned on the home notice. In this manner the parents who wish to co-operate with us are afforded an opportunity to place our findings before their family physician for his consideration, diagnosis, and subsequent treatment if such be necessary. In the absence of a family physician, frequently pupils are taken, with the parents' permission, by the school nurse for the follow-up work of diagnosis and treatment to the out-patient department of the Union Hospital in Fall River.

RESULTS OF EXAMINATION

The tabulated results of the examination are inclosed. Although they speak for themselves, they certainly do not provide much cause for rejoicing.

Fortunately the greater number of the defects can be corrected if the parents will co-operate with the School Department. If, however, they consider these matters too trifling to attract their attention, or if they adopt an attitude of resentment toward what they consider unwarranted interference on the part of the State, the outlook for healthy Westport citizens of the future is hardly bright. Remember that we ask only that parents submit the findings of our examination to their own family physician and dentist for immediate consideration. Were this to be done by all parents concerned, the report for next year would be as cheering as that of this year is disappointing.

The appalling increase of heart and arterial diseases throughout our country, as attested to by State and National Bureaus of Vital Statistics, is attributed in a large measure to absorption from pus pockets of varying sorts.

The drainage from large infected tonsils, carious teeth, enlarged glands, and running ears means the heart disease, the arterial damage, and the rheumatic joints of the future.

Unless the Westport school children and their parents realize the significance of the inclosed examination figures and make every effort to do their part in the eradication of all correctable defects, there will be a large number of chronic invalids with whom the next generation of physicians must cope. Another factor to be considered in connection with such a situation is the possible economic loss to the community.

CONFERENCES

Your school nurse and I attended the Bridgewater Conference of School Physicians and Nurses which was held under the auspices of the State Department of Public Health and Education. We derived much benefit from the meetings.

We also went to Plymouth to study the health program in operation in that town. We were delighted with the fine co-operative spirit that was displayed by both school and health departments for the public benefit. There we found community ideals reaching out to intensely practical results and a comradeship in public service that was both admirable and stimulating. There was such a spirit imbuing the community that it is not surprising that Plymouth is ranked among the foremost towns in Massachusetts as a health center. You will recall, among other things, the Department of Dental Hygiene, the open-air school, the health lectures to both teachers and pupils, the follow-up work, the co-operative parental attitude toward all health-promoting activities. This attitude could never have been achieved without the understanding co-operation of the Board of Health and that of the whole medical profession. Any community might profit by a study of the many splendid activities to be found in the health program of the Town of Plymouth.

PLANS FOR THE FUTURE

1. We expect, in the near future, to introduce into our schools on a voluntary basis the Schick test and the toxin-anti-toxin diphtheria prevention method. Dr. Richard MacKnight, State District Health Officer, has very kindly offered his services in this campaign.

2. In accordance with our established custom, we shall invite the State Tuberculosis and Mental Disease workers to assist us in their specialties.

3. We shall invite Dr. Frederika Moore of the State Department of Public Health to go through a cross-section of our work by way of check up.

4. In regard to the control of communicable disease, we have already petitioned the local Board of Health to publish their rulings so that we in turn may circularize these rulings in pamphlet form among our teaching staff, and through our children among their parents. This will save much wasted time and not a little annoyance.

5. AN OPEN AIR SCHOOL FOR WESTPORT would be a very desirable, not to say necessary, addition to our health program. There are at least twenty-five children whose best interests would be conserved by that type of school and ten times as many who would be immeasurably benefited by it.

6. A DENTAL HYGIENE DEPARTMENT seems to me, in view of our dental defects, to be more than necessary. Should it appear that the cost of such a project would be unduly large, it might be advisable for us to approach one of the neighboring small towns and urge co-operation for mutual benefit.

7. I feel that some steps should be taken to deal with disease prevention problems among the children of pre-school age. The number of physical defects of our first grade children tends to prove that such procedure on our part would be wise.

8. Owing to the large number of posture defects among our children and in the interest of the physical well-being of all of them, I recommend an extension of our physical education program and the employment of a trained physical director.

9. Parents should be encouraged to report all cases of communicable disease in their homes to both the School Committee and the Board of Health. They should also be assured that such procedure on their part will involve them in no expense and will make no demand whatever on them to employ any physician, should they consider it unnecessary to do so.

ACKNOWLEDGMENTS

1. The Out-patient Department of the Union Hospital has given us invaluable aid in our follow-up work and has rendered this service at no cost whatever to the public of Westport. I wish to express our appreciation of the excellent facilities the hospital has afforded our children for the correction of their defects.

2. I acknowledge with pleasure my indebtedness for most vigorous co-operation and support on the part of yourself and the members of the School Committee.

3. The work of Miss Agnes Vickery, school nurse, requires unstinted commendation. Her interest in the examination and her courage in the face of tremendous difficulties in her follow-up work are matters for admiration.

Mrs. Josephine Manha Howland has also rendered most valuable and effective co-operation.

The teachers have at all times shown an interest in our health program and have helped us considerably.

Inspector William H. Cairns of the Massachusetts Department of Public Safety has helped us to study difficult problems in heating and ventilation and has already submitted his report to you.

CONCLUSION

There is much to be done by a school physician who is interested in his work. At present, we are merely plowing ground and sowing seed. It remains for the future to disclose what the results of our efforts will be.

Respectdfully submitted,

THOMAS CONRAD WOLFF, M. D.

School Physician

American History & Civics, 5 periods
Physical Education, 2 periods (equivalent)
Club $\frac{1}{2}$ periods (Minimum)

§ Required.

† See special outline of course.

‡ Alternates with Physics.

* Chosen to meet major and minor requirements. Not less than $18\frac{1}{2}$ periods of work may be regularly taken. Extra work taken only by permission of the Principal. Variables with Roman numerals must be taken in order and are open any time after the year for which stated. Seniors make up their electives from those previously offered. Juniors and Seniors combine to make classes of fair size.

Those making college preparation are advised to choose electives from "College Group."

Those confident that they will not attend college are advised to major in one of the three vocational fields, Agriculture, Commercial Practice, Household Arts.

1926

AGRICULTURAL COURSE

1927

Group I (Beginners)

English 9	4 periods	
General Science	4 "	
Agricultural Survey	5 "	(4 period minimum)
Agricultural Project	10 "	(4 " " ")

Home Project:—Poultry and Garden (family).

Physical Exercise 2 periods

Club $\frac{1}{2}$ "

Group II (2nd year)

English 10	4 periods	
Elective	4 "	
Agricultural Survey	5 "	(4 period minimum)
Agricultural Project	10 "	(4 " " ")

Home Project:—Poultry and Garden

(Expansion of project work of Group I).

Physical Exercise 2 periods

Club $\frac{1}{2}$ "

Note: The work of Groups I and II now coincides in major details. It is new work, however, for both groups. Group I of this year will take with Group I of next year the work that the present Group II took last year.

The present Group II boys on entering Group III next year, if offered, will do work entirely independent of Groups I and II.

In this way 4 years of Agriculture may be opened up by one teacher. Groups I and II would pair, alternating the work for their years together and Groups III and IV would team in similar manner.

Household Arts Course Westport

Two Year Course

9th Year

Pre-Household Arts Course

English 9	4 periods	
Civics 9	4 periods	
General Science	5 periods	Required of all girls except college preparatory.
Elementary Clothing		

One or Two Electives:—Those open to ninth year.

10th Year

Household Arts Course

English 10	4 periods	
Clothing I	4 periods	(4 periods of direction, 4 project)
Foods I	3 periods	(1 period of Recitation, 1 double Laboratory period)
Drawing I	2 periods	(2 periods of Laboratory)
Laundrying I	2 periods	(2 periods of Laboratory)

Electives:—Those open to 10th year.

11th Year

Household Arts Course

English II	4 periods	
Clothing II	4 periods	(4 periods of direction, 4 project)
Foods II	3 periods	(1 period of Recitation, 3 of Lab.)
Home Nursing I	2 periods	(Double period outside preparation)
Home Problems		
Budgeting I	2 periods	

One elective:—Those open to 11th year.

12th Year

If student remains in High School, she will elect subjects from the general curriculum. She may continue work in sewing and millinery under whatever supervision the Household Arts Teacher may be able to provide. Such work will receive only imited school credit for Graduation.

Clubs and Physical Exercises are required of every student each year.

Girls 14 years of age and properly qualified may enroll in the 2 year course without having met all the requirements of the 7th, 8th and 9th years but cannot receive a diploma from High School until the Constants and 109 credits have been earned.

Westport High School

"THE SIXTH PERIOD"

OR

"EXTRA CURRICULA PERIOD"

There still seems to be some confusion in the minds of some of our citizens concerning the activities of the "The Sixth Period" (2 p. m. to 3:10 p. m.) of our "High School Day."

1. The Sixth Period is a part of our regular school day and serves a triple purpose.

(a) It is used as a detention period.

Those pupils whose conduct or class standing indicates a need of special discipline or attention are obliged to report for detention. Detention takes precedence over all other activities of the sixth period.

(b) From December first to April first the sixth period may be used for study by all students not engaged in club activities.

Clubs are organized under "Charters" issued by the School Council. They meet once a week or bi-weekly and 20 or 10 meetings are necessary if credit for graduation is to be allowed. A teacher is in charge of each club.

This year the following clubs are functioning; The French, Latin, Shorthand and Typewriting, and Typewriting Clubs meet weekly and are open to members of the seventh and eighth grades. The Current History Club, open to all, and the Debating Club, open to pupils in the last four years, meet bi-weekly. Our State-aided Vocational Departments conduct a Craft Club open to girls who have previously been enrolled for Household Arts, and a Poultry Club open to pupils owning and caring for large or small flocks. These clubs together

with the Ukulele, Glee, (open to girls only) and the Boys' Orchestra and the Boys' Soccer Clubs meet weekly. There is in process of formation a Spelling Club made up of a group of pupils interested in conducting spelling bees.

The above list of activities we believe should offer opportunity for vocational, cultural, and social improvement. Students are obliged to elect 20 periods of club work but aside from the above mentioned restrictions the choice is optional with the individual. Assuming that during this period, therefore, students are doing what *they* want to do a good opportunity is given the teachers in charge to measure the pupil-possibilities in several of the fields of our school curriculum.

(c) From the opening of school in September to December first and from April first thru the school year the "Physical Education Program" demanded by State Law is in operation.

All pupils who are not ill or subject to physical disabilities which do not permit of active exercise are obliged to engage in some form of organized physical activity. All full-time teachers as a part of their regular school work are required to handle detention or supervise a group of students in one or more activities.

This past fall our girls engaged in playground baseball, field hockey, soccer, and less strenuous playground games. No competition with outside teams could be arranged. Our boys were members of the football squad or were playing baseball under the guidance of Mr. White.

Next spring we plan playground baseball, soccer, track, field hockey and croquet for the girls and baseball and track for the boys. There is a possibility that some tennis for girls and boys will be possible.

During this portion of the school year pupils in detention for either deportment or study are, weather permitting, taken

out-of-doors by the "Detention Teacher" and spend 15 minutes in formal callisthenics.

I trust this explanation of our Sixth Period Activities will dispell the fear of some that it is probably time wasted. The teachers find it the busiest period of the day.

WESTPORT HIGH SCHOOL SERVICE POINTS SYSTEM

A good citizen of a community performs community duties in order that his town or city may be benefited by such service. A school is a small community made up of pupils who might be called citizens. There are many good Westport High School citizens who have received little or no recognition for these services. There are other Westport High School citizens who would gladly perform more duties if some recognition was given for such performances. For this reason the following scale has been established. Look it over and choose some duty that you can perform for your school. If we all make a special effort to perform a number of duties this year, we will not only receive recognition for our services but we shall also make our school spirit even better than it is at the present time.

SERVICE POINTS

	7	8	9	10	11	12	
Class President	1	2	4	6	8	10	Year
Class Secretary	1	1	1	1	1	2	Points
Activity							Points

Solo work	2
Group work (not more than 3-5)	1
Group work	$\frac{1}{2}$
Prize Essay	4
President of School Council	10
Other Officers	3
Other Members	2

$\frac{1}{2}$ POINT CREDIT FOR EVERY HOUR

Washing blackboards
 Tag sellers
 Arranging of desks and tables in recitation rooms
 Library work
 Office work
 Typewriting work
 Printing Latin Vocabulary
 Printing Posters

Taking charge of class

Help on Senior Play — furniture, property, prompting, etc.

Not more than **25** points shall be carried by one person at a time.

All pupils receiving 50 service points will receive a silver service pin.

All pupils receiving 100 service points will receive a gold service pin.

Each pupil shall petition the school council for service points gained.

WESTPORT HIGH SCHOOL

Requirements for Graduation

Beginning with the 7th year class of 1923 the following credits for graduation will be required:

Prior to the close of the 12th year 109 credits must have been earned. A credit shall be the equivalent of 30 hours of work covered in one school year.

All constants in the Curriculum will be required for graduation. (Exceptions to this rule will be made only by decision of the Principal and Superintendent and with the consent of the School Committee).

Of the other credits required, not more than 18 may be selected from the Physical Education and Extra-Curricula Groups.

Majors and Minors

Variables must be chosen in years 9 to 12 inclusive that credit for one Major and two Minors shall be earned.

A Major shall be the equivalent of at least three years of work (12 credits) in one field.

A Minor shall be the equivalent of at least two years of work (8 credits) in one field.

Major and Minor Groups

Social Studies
Science
Mathematics
Languages (other than English)
Commercial Studies
Agriculture
Household Arts

Diploma

A Diploma (the same for all) will be granted at the time of graduation. These students finding it necessary to leave before graduation requirements have been met, and rating honorable dismissal will, upon request, be given a statement of work accomplished and Class Standing Attained. This will be signed by Principal and Superintendent.

Promotion and Class Standing

Promotion will so far as is possible be made by subject.
To rank 8th year—15 credits are required.
To rank 9th year—31 credits are required.
To rank 10th year—48 credits are required.
To rank 11th year—68 credits are required.
To rank 12th year—88 credits are required.
Graduation—109 credits are required.

WESTPORT HIGH SCHOOL
GRADUATION EXERCISES OF THE CLASS OF 1926

Westport Grange Hall, Tuesday Evening, June 15, 1926.
