The above ends page 141. the next page is 145. but it does not appear that any leaves have been torn from the record. The connexion between the ending here and the commencement on page 153 is not close. but notwithstanding this and the lack of pages 142. 143. 144 I am inclined to think that the record is all here. I however have a blank that the record can be copied should any missing leaves be found. The dates would indicate that I am right in the Conjecture that no leaves are missing.
