Referring to previous correspondence regarding the erecting of a signal over station Almy, 1844, located in a cemetery near Westport, Massachusetts, you will please establish a new station "Almy 2", outside the cemetery and determine its position accurately from the 1844 station, using the old station as one of the reference marks. The description of the new station should state the reason for its establishment.

You will remove all trace of the signal erected in the cemetery and endeavor insofar as possible to placate the local people who feel that your party has desecrated graves in the cemetery.

You will please give this matter your personal attention and make a report to this office as soon as all the details have been attended to.

Director.

The foregoing are true copies of letter and copies of letters as above stated.

The special committee appointed at the last annual meeting to consider the advisability of the erection of a new high school building presented a report which was read.

Voted: That this report be accepted for record.

REPORT

TO THE VOTERS OF THE TOWN OF WESTPORT

We, the committee that was appointed from the floor of the annual Westport Town Meeting in 1935 to investigate and report back to the town Voters our findings relative to High School needs, submit the following report:

We find school housing conditions at the High School to be overcrowded. The new enrollment at the High School, approximately 165 students, with insufficient home room locations for each of these students on the main floor of the school. There are at present three rooms being utilized in the basement, two of which are used for home room purposes. These basement rooms are poorly heated and ventilated and the light is very poor.

State inspector - William H. Cairns, notified the School Committee that before these basement rooms could be used for class room purposes at the commencement of the next school year, the same would have to be re-modeled in order to meet with the laws of the commonwealth, otherwise the Town must provide other suitable housing facilities for pupils now using these rooms, and it is necessary that immediate steps be taken to correct the situation. Inspector Cairns has agreed to an extension of time in the use of the High School Building as it now stands pending the action of the town for the immediate construction of a new High School or suitable additions at the present location.

In case a new building is considered, some allowance for future increase should be made and this committee believes that such a new building should be ample to provide for 300 pupils and no smaller capacity should be considered in a new building. This committee also believes and recommends that an auditorium capable of seating 600 people should be constructed as a part of the building which would be a combination gymnasium and auditorium.

We recommend a new High School with facilities sufficient to accomodate 300 pupils and an auditorium with seating capacity for 600 people can be built for the sum of \$105,000. Of this amount the Government will grant the Town of Westport \$45,000. This is an outright grant from the Federal Government, under the P. W. A. The balance of \$60,000, to be paid by the town. Of this \$60,000 we have asked for the transfer of \$5,000 which was appropriated at the annual Town Meeting in 1935. As you remember this \$5,000 was for the remodeling of the basement in the present High School. The balance of \$55,000 to be appropriated and payable by the Town in notes to be paid over a period of 20 years.

Signed,

The Investigating Committee
