# What is a HOUSEHOLD HAZARDOUS PRODUCT?

Often referred to as Household Hazardous Waste (HHW), Household Hazardous Products are new or used household chemicals and products sold for home care, personal care, automotive care, pest control and other purposes. These products exhibit many of the same dangerous characteristics as fully regulated hazardous waste due to their potential for reactivity, ignitability, corrosivity, toxicity, or persistence.

  - ◇ Recycle the balance.

Never pour Household Hazardous Products down the drain, into a storm sewer, onto your lawn, or onto the ground!
